The Pagoda, Kyomidzu. A pagoda (a Portuguese corruption of the Persian but-kadah, "idol temple") is originally an Indian temple. Pagodas vary in height, being as much as thirteen stories and sometimes having walls thirteen feet thick. Some of the pagodas in Japan, which are amongst the finest edifices in the country, are very seldom open to strangers. The smaller shrines far exceed in number those of any other country of the same population and extent.
